

Safe and responsible

at BOOK WORLD PRAGUE – International Book Fair and Literary Festival

Dear visitors,

We want you to feel safe and comfortable at the book fair, which is why we respect all the applicable anti-epidemic measures, and in some cases add our own. We kindly ask you to be mutually respectful, believing at the same time that this is second nature to all book lovers.

What documents will I need?

To speed up the process we recommend using a specialised application in your mobile phone documenting your vaccination or a printed certificate. For organised groups (mainly schools) we accept a written statement signed by the group's organiser that all members of his/her party conform to the V-N-T rule.

A testing station will be available at the venue, providing certificates without prior registration.

- 1 We monitor all indoor capacity to ensure that visitors can maintain distances of 1.5 metre.
- 2 Respiratory protection must be worn at all indoor venues.
- 3 Contactless disinfectant dispensers are located throughout the book fair, kindly use them.
- 4 All exhibitors, subcontractors and performers must adhere to the V-N-T* rule.
- 5 All foreign guests must conform to the rules for entering the Czech Republic.
- 6 We also ask all our visitors to adhere to the V-N-T* rule. This may result in longer waiting times at the entrances. We therefore kindly ask all visitors to plan ahead and excuse any delays.
- 7 A testing station will be located at the venue's entrance, offering fast certified testing, free of charge.

*What is the V-N-T rule and what documents do I need?

The V-N-T system is a method for verifying your eligibility for the event on healthcare grounds. It consists of three main parts: vaccination, testing and recent recovery from Covid-19.

Vaccination – at least two weeks must have passed since you received the last dose of the vaccine.

Negative test – RT-PCR check not older than 7 days ago or a certified antigen test for the SARSCoV-2 virus undertaken maximum 72 hours ago with a negative result, or a certified antigen test undertaken at the venue.

Post-recovery safety period – no more than 180 days have passed since your first positive antigen test for the SARS-CoV-2 virus or your RT-PCR test for the SARS-CoV-2 virus.
